80A轉接頭使用在台灣LUXGEN M7 EV+沒有任何問題，非常好用。

We got the 80-amp version for future proofing. Our Audi has a maximum 71772 charge rate of 9.6 kW and that's what we see on Destination Chargers.

Terrific quality and exactly as advertised.

**Matt W.** (verified owner) – 2022-02-02

Very high quality construction and heavy! I love the switch that locks the Tesla plug into this adapter. Very secure. My only suggestion for improvement would be to include a plastic cap to keep dirt/rain/snow out of the vehicle side of this connector when it's not plugged into a vehicle.

**Jacob** (verified owner) – 2022-02-02

Worked to charge a Kona EV from a Tesla home charging station.

**Alex C.** (verified owner) – 2022-02-03

I haven't had the chance to test it yet. I bought it as a just-in-case measure while travelling, and due to the pandemic I have been largely housebound.

**Thomas K.** (verified owner) – 2022-03-09

Works great at friends' houses that only have Tesla EVSE.

**DELBERT** (verified owner) – 2022-03-17

good Quality, fast service

**Evan** (verified owner) – 2022-06-06

We're using this adapter on a 2019 Chevy Bolt and it's working perfectly. Seems to be well built and we've had zero problems using it. Very happy with the purchase.

**James S.** (verified owner) – 2022-06-17

The adapter worked great – saved me from being stranded when a non-Tesla charger didn't work and only Tesla Destination was left at a hotel.

**Rudolph** (verified owner) – 2022-06-20**Steve** (verified owner) – 2022-06-27

Works great for my daughter's 2013 Leaf.
